WORK EXPERIENCE

BR KN Owner / Software Developer @BRKN Digital
July 2021 - present

Bucharest, RO / Global

Motivated to always move forward, decided to start a new path in my software developer career by opening my own Romanian Limited Company.

arnia Software Developer @Arnia Software
February 2018 - present

Bucharest, RO

Worked as an experienced Full-Stack Software Developer, for a company with multiple foreign clients and bigger projects placed in the Tech Industry. Continued to improving my experience within the .NET Framework ecosystem, but I was also led to improve as a Web Developer. I worked on main and side projects including strong frontend technologies, such as React.js and Vue.js. I never cease to learn, get myself into new areas and discover interesting solutions for the problems that I encounter.

editec Software Developer @EDITEC
September 2017 - February 2018

Bucharest, RO

Discovered the model and functionality of a gambling and lottery business, by working on a payment integration gateway.

Eminu Software Developer @Eminu Software
April 2015 - September 2017

Bucharest, RO

While still being my first full-time job after finishing my studies, I already knew some of the basics of programming. Have learned a lot during my time here, starting from microservices, APIs, gateways, queue management, up to the introduction of the Web Development area, where I slowly started with ASP.NET MVC, vanilla JS, jQuery, Angular 2. I also started understanding complex business and multi-tier applications, by getting involved in the application configuration and deployment process.

RBC C# Programmer @Romanian Business Consult
April 2013 - September 2013

Bucharest, RO

Started initially with the mindset of an internship, quickly transitioned into a part-time job. Quickly evolved, already having worked with C# during high school. During my main work for desktop applications, I have also started learning to work with databases, scripts, procedures, versioning and source control.

EDUCATION
